CEO Message

Nexen is a holding company of the Nexen Group that includes Nexen Tire, KNN, Nexen D&S, and Nexen Wolsuk Cultural Foundation. It is an operating holding company comprised of the rubber business division which manufactures and sells rubber products, such as tubes for automobiles, and the logistics business division which provides integrated logistics services. In the rubber business division, Nexen's automobile tubes are exported worldwide to over 140 countries and maintains the largest global market share. Meanwhile, industrial solid tires are being supplied to leading local and overseas forklift manufacturers due to their high durability and safety. Moreover, our accumulated rubber mixing technology is used to satisfy the customer demands to the CMB, while Saintnine brand golf balls are continuously loved by many golfers around the globe.

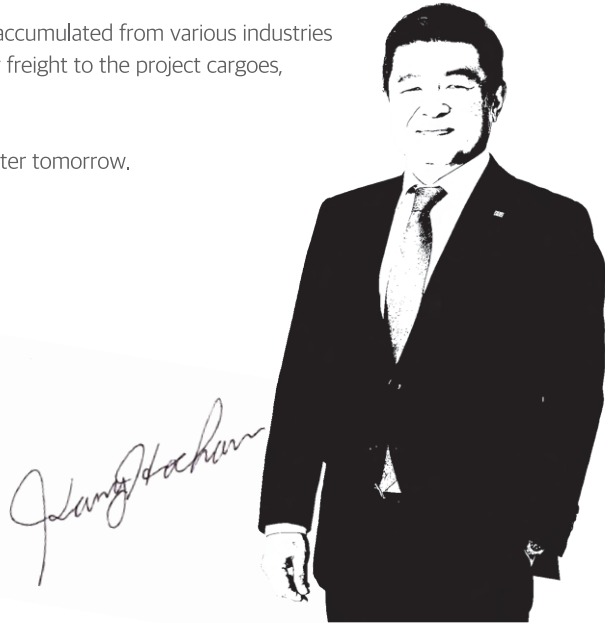

In the logistics business division, Nexen utilizes its know-how accumulated from various industries to provide the best services in all logistic areas from sea and air freight to the project cargoes, land transportations, warehousing, and logistics consulting.

Please keep an eye on Nexen's vigorous takeoff to create a better tomorrow.

A company that thinks of tomorrow
A company that prepares tomorrow
A company that creates tomorrow's values

Nexen, the global leading company,
will build a happy tomorrow that everyone dreams of!

CEO Travis Kang

NEXEN CORP.

Global No.1 that prepares tomorrow.
Nexen will achieve the goal
with its customers.

TIRE INNER TUBE

Nexen takes responsibility for the safety aspects
that may remain unseen.

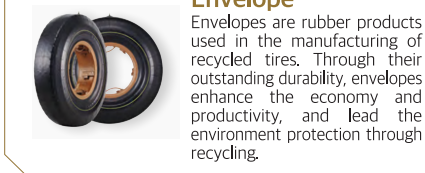

Based on the know-how accumulated for the past 50 years and our continuous technology development,
we are producing the world's best tire inner tubes for vehicles and exporting to more than 140 countries worldwide.

TIRE INNER TUBE, a part used by all vehicles, from sedans to trucks and buses

Tire Flap

Tire flaps refer to rubber products that are installed between the tube and rim. Nexen is producing the world's best products with various sizes and supplying them together with tube to the global market.

Envelope

Envelopes are rubber products used in the manufacturing of recycled tires. Through their outstanding durability, envelopes enhance the economy and productivity, and lead the environment protection through recycling.

INDUSTRIAL TIRE

Global Standard of the Industrial Tires.

CMB

CMB is an eco-friendly product manufactured
in high-performance automated facilities with an optimized mixture design.

We are producing and selling products that meet the specification and quality required by customers with our accumulated know-how on the blending technology in the field of automotive and industrial parts, architectural products and marine related rubber products.

BLADDER

Our bladders are made by tire experts.

Nexen's bladders with precise design and outstanding durability perfectly retain the shape of the tires during their manufacture and innovatively enhance the quality and productivity of tires.

BUOY

Nexen makes the best-in-class buoys.

Can be used for both surface/hydrostatic pressure uses

High durability

- ▶ An outstanding restoring force that can withstand a pressure of 6 tons
- ▶ Sturdy ring that withstands more than 500kg of air leaks

Certified materials

- ▶ Materials that are not crumbly
- ▶ Soft materials reduce the risks of injuries

LOGISTICS

Nexen Logistics,
the optimized logistics service provider

Sea

Beyond The Ocean

Nexen always strives to fully satisfy its customers by securing competitive freight cost and space based on its stable volume, customized services to satisfy various needs of the customers, and prompt and accurate feedbacks through its global logistics network.

Break Bulk

Reliable Break Bulk Management

With the know-how accumulated from many years of bulk transportation, the service routes and schedules optimized for each region/cargo based on its expertise, and the best freight cost, Nexen strives to reduce the bulk cargo logistics fees and enhance the efficiency of its customers.

Inland Transport & Distribution

Provides safe and quick transportation services to major Korean seaports and cities

With a fleet of trucks exclusively contracted to logistics hubs in major regions, Nexen is able to deliver cargo to regions promptly, while the Nexen's mobile system provides electronic invoice management services and real-time cargo tracking services for its customers.

Warehouse

Provides the optimized cargo warehousing services through cargo warehousing system

Nexen provides the optimized logistics management services through its specialized cargo warehousing system by placing the import/export/domestic cargoes that require warehousing at the optimal hub.

Air

Fast, Safest and On Time

Nexen is providing a one-stop service that enables quick, safe, and timely delivery of cargoes to any destination requested by the customers through its optimal flight schedule and competitive air freight costs.

Knock Down Service

Provides a differentiated KD logistics services based on its diversely accumulated know-how on automobile part logistics

Nexen provides KD service - a service where the auto parts from local and overseas suppliers are supplied to Nexen, who then makes timely delivery of the parts to the production lines of the completed vehicle manufacturing plants.
